

FORTRESS Hitchlock Instructions

Components

Specific models may vary slightly from model shown

Maintenance

On a regular basis for optimum performance:

- Clean and lubricate moving parts.
We recommend using SAS Mint General Protectant Spray to lubricate the locks of all our products.

Spare Parts

Replacement Parts can be ordered at your local SAS dealer, or online at www.sasproducts.com

SAS FORTRESS Hitchlock Instructions

The Fortress Hitchlock is available in various different models to suit different hitches. These instructions cover the Fortress (FORT) range, excluding the FORT 2 GOLD.

The hitchlock comprises of two main parts - the painted outer section, and the inner silver section.

To separate the two sections: -

1. Insert your cross key into the hitchlock lock in the coloured outer section, with the flat section on the cross key facing the front of the hitchlock.
2. Turn the key 180 degrees to unlock, then slide the inner silver section out of the outer.

To fit onto hitch: -

1. The red label on the silver section has "HITCHED" and "UNHITCHED" on - one reading correctly and the other inverted. Slide the inner silver section over the hitch from one side, ensuring the red label reads correctly for depending whether you are fitting on a hitch that is hitched or unhitched to vehicle or other hitch point.
2. Now slide the coloured outer section over the inner silver section from the opposite side of the hitch. Ensure that the two sections are full pushed together, then insert key onto the lock and rotate 180 degrees and remove key.
3. Ensure the inner section is locked into the outer.

IMPORTANT

1. Never move or drive vehicle with the hitch lock fitted.
2. It is imperative that the hitchlock is fitted correctly for effective protection.

About SAS

We understand the life of towing and what is important to you.

A caravan or a motorhome is more than a box on wheels – it is a home, a store of happy memories and a lifestyle. A trailer is more than just a transport device – it is still the most flexible means available to transport bulky items from A to B by yourself. We know the importance of the experiences you build in your caravan or the days you spend with your trailer behind you.

Unfortunately however, in today's world, crime and theft continue to increase. Over 4000 caravans are stolen in the UK each year*, and less than 3% are ever fully recovered**.

Our vision is to bring a stop to caravan and trailer theft with quality, reliable security solutions that deter criminals and prevent crime. We are on a mission to preserve your assets and memories and give you peace of mind.

Nothing speak of quality, reliability and peace of mind quite like a SAS CLAMP.

In over 30 years of speaking to owners of trailers and caravans, we have developed our solutions to fit your needs, and we are proud of the confidence placed in us by owners, insurers, quality controllers and our distribution network alike.

Visit the SAS website today to find other ways to SECURE YOUR WORLD.

* According to AA Caravan Insurance

** According to Club Care Insurance figures
